

Thank you for purchasing Crystal Acoustics Cuby

Cuby uses a **unique driver design** to create a fully immersive 360° **room filling musical experience**, as well as convenient, compact size **for placing it anywhere in your house**.

Small yet powerful, it produces an **unexpectedly deep and clear bass**.

With Cuby, you can **connect numerous devices** and enjoy countless hours of **non compromised listening**.

Acoustic Features:

- **5 Drivers** (Cuby-5MR), **9 drivers** (Cuby-9MR) with Balanced Directivity for **wide sound everywhere in the room**
- **Ideal In-Room** response using **WiSound technology**
- **Incredible Bass** down to **38Hz** (Cuby-5MR), **35Hz** (Cuby-9MR)

1 Place it

Cuby uses a **unique driver design**. By positioning drivers **at the sides and top**, your speaker can achieve an **ideal In-Room Response**.

Thanks to its innovative design, you can **place your Cuby anywhere in the room** and **hear the sound perfection everywhere**.

For the **optimal use** of Cuby, please remember **not to cover the unit's top and side speakers**.

Place it near the back wall and not too far from the side walls in order to have **richer reflections and three dimensional sound field**.

Of course, this is a **useful hint** to enhance **sound perfection**, contrary to **conventional speakers** that **suffer from wall reflections**.

WiSound Speaker

2 Connect it

Connect Cuby to your devices through:

1. **Optical:** If available, use this connection **for best quality**
2. **RCA:** Connect **both left and right** channels to your device
3. **AUX 3.5mm:** Connect to the **headphone** output of your device
4. **USB:** Play songs from your **USB HDD/Flash** or **charge your phone/tablet**
5. **Ethernet:** Get **network access** in case of no/weak Wi-Fi signal

*Note: When the 3.5mm socket is used, it takes **priority** over the RCA input and it becomes the **Auxiliary Source**. In this case the RCA input is **-muted**.*

*Note: To **save power**, Cuby will **automatically turn off** (in optical / line-in mode) if **no sound** has played through it for **30 minutes**. It will automatically **turn on** again once it **receives a signal**.*

3 Control it

Control Cuby by the unit's **top panel keys**, or the included **remote control**. Use either **short** or **long** press for **dual function** capability.

Long press

Power ON/OFF BT Pairing Radio Preset Selector Volume Down Volume Up

Short press

Input Selector Play/Pause Mute Previous Track Next Track

Power ON/OFF Mute

Play/Pause Volume Up

Previous Track Next Track

Volume Down

Web Radio Presets

Bluetooth Pairing

Learning Function Input Selector

*Note: If in **maximum volume** you are experiencing **crackling sound** during heavy **Bass passages**, the **protection mechanism** for the amplifier and speaker drivers has been activated. **Turn down the volume a bit!***

4 Select it

Use the **Input button** on the **unit** or on the **remote control**, to **cycle** between the various available options:

Input colors are according to table:

Color	Input
Blue	Bluetooth
Red	Optical
Green	Aux
Yellow	Wi-Fi

Bluetooth Optical Auxiliary Wi-Fi

5 Pair it [Bluetooth]

You can connect your Cuby with any **Bluetooth enabled device** (phone, tablet, computer, etc).

1. Select the **Bluetooth input** either **on the unit** or on the **remote by cycling Inputs**.
2. To **pair** a Bluetooth device to Cuby, **press and hold the pairing button** for about **5sec**. The Bluetooth indicator LED will **start blinking**.
3. Consult the instructions of the device **to be paired** to connect to Cuby. Successful pairing will be signaled by a **'beep'** from the unit and the **Bluetooth indicator LED** will **stop blinking**.

Once paired, **music** from your device **will play** through the unit.

To add another Bluetooth device, **repeat from step 2**. Cuby may store up to **eight** paired devices in memory.

6 Network it [Wi-Fi]

Use **App Store** (IOS devices) or **Google Play** (Android devices) to download **WiSound** application (**Wi-Fi connection and internet access are required**).

Run the App and **follow on screen guide** to setup network.

To **add the first speaker** in your network:

1. Press **Add Device** button

2. Type the **password of your wifi network** and press next

3. Press the **WPS button** on the **back** of your **speaker** and press **next**

4. The **App** searches the speaker and **automatically adds it** to your **network**

5. You can now **select the speaker's name** or **set a custom one**

6. To **add more speakers**, **press + on the top right** and **repeat steps 1-5**

Note: If you use **Ethernet connection**, instead of Wi-Fi the above procedure is not required. You **just need to run the App** and the speaker is already there!

Table below summarizes the **network status** depending on **LED**:

Useful:

If there is **no Wi-Fi router available**, you can connect your phone/tablet **directly** to the speaker's network. Typically the name is **CubyX_YY** and the default password is **Wisound1234**. You are strongly advised to **change this password** through the **App** or through your **speaker's web interface (10.10.10.254, under Network tab)**

7 Group It

In the **list of the available speakers**, grab and **drag one speaker and drop it over another speaker**. In this way, this speaker (slave) becomes **part of a group** and **Master's music** is also played through all the **Slave speakers**.

If you want to **ungroup**, just grab and **drag the slave speaker below the middle line**. Slave speaker becomes Master speaker and **can play different music**.

Useful:

- You can make **one or more** groups
- You can have **more than one Slave** speakers under the **same Master**
- In a Group, even if the source is **Optical / Line in / Bluetooth**, you can listen to Slave speakers playing the **same song** as the Master speaker (**Redirect feature**)
- You can simultaneously control the **volume of all the speakers** in a group by using Volume buttons of your phone/tablet
- For a **Group** configuration, choose which speaker can play **Left (L) , Right (R) or Left/Right (LR)**, by touching the **relevant icon**.

8 Learn it

You can **control Cuby's volume** with your **TV's remote control**. To learn your TV's remote to Speaker:

1. Keep pressing **LEARN** button on **remote** for about **2 seconds** (LED slow blinking)

2. Press either **Vol+ on speaker's remote** (LED fast blinking)

3. Press relevant **Vol+ on TV's remote** (LED stops blinking)

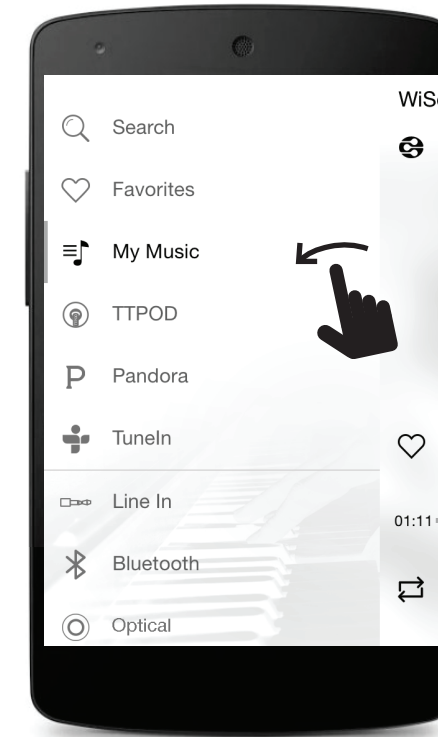

4. Repeat steps 1-3 for **Vol-**

Note: Some TV remotes **may not be compatible** with **Learning function**

9 Play it

Music Selection

Now playing

Available speakers

- Select your **local** songs or **USB** songs through **My Music**
- Access **Web Radio** through **TuneIn**
- Change **Input** through **Line In / Bluetooth / Optical**
- Search** for **online songs** through **Search**
- Access** your **Favorites** through **Favorites**
- Access **Web services** (Pandora/Spotify/Deezer) by touching the **corresponding icons** (region dependent)

Useful:

Your friends/guests can **stream** their music to the **entire group** of speakers **without downloading any Apps** or having to **connect** to your sensitive **Wi-Fi** network. Just ask them to **pair** their phones/tablets via **Bluetooth** to the **Master speaker!**

10 Preset it

To **assign** web radio stations to **preset** buttons (up to 6 stations can be assigned):

1. Select **TuneIn**

2. Browse your favorite **station**

3. Press the **small icon** next to the **web radio station**

4. Select the required **preset number**

Any time wishing to **access** the **preset** web radio stations, simply **select Wi-Fi as input** and **press** the relevant **button** on the **remote**. Alternatively, each **long press** of **RADIO** button, **cycles** to radio presets.

11 Charge it

You can charge any **USB** powered device. Just **plug it** to your Cuby's **USB Power Out**.
